Enterprise Data Platforms, Data Governance & AI DataOps

I help enterprises turn fragmented data operations into governed, reliable, AI-ready data platforms.

DAMA CDMP Practitioner · ex-FICO · ex-EY · Enterprise Data Platform Governance · AI Data Governance

15+ years building governance-led, audit-ready enterprise data platforms that improve reliability, reduce failure cost, and increase trust in data products. My Detect → Resolve → Prevent model reduced pipeline incidents by 95%, protected 232M+ records per extraction cycle, and strengthened data reliability across regulated, data-intensive environments. Open to Senior Data Leadership roles across enterprise platforms, governance, DataOps, AI governance, and data products.

OPERATING MODEL

— How I Deliver Reliable, Governed, AI-Ready Data Platforms

DETECT

Profile signals, anomalies and metadata gaps.

RESOLVE

Triage RCA evidence and repair pipelines.

PREVENT

Codify data contracts, SLAs and controls.

GOVERN

Align lineage, privacy, ownership and audit.

SCALE

Automate scorecards, adoption and reuse.

95%

Incident Reduction

Detect → Resolve → Prevent

232M+

Records Protected

per extraction cycle

\$2M+

Annual Savings

failure costs eliminated

50+

Enterprise Clients

governed at scale

CORE CAPABILITIES

Data Governance & Quality

- DAMA-aligned enterprise governance frameworks
- Metadata management, cataloguing & lineage
- Data quality scorecards, SLAs & controls
- Data ownership, stewardship & accountability
- MDM, reference data & data contracts

DataOps & AI Governance

- ServiceNow-driven incident automation
- AI anomaly detection & model monitoring
- Model governance, explainability & audit trails
- AI risk classification & guardrails
- Cloud data platform reliability & observability
- Metadata-driven quality framework

Compliance & Audit Readiness

- RCA-ready evidence and audit packs
- Privacy controls — GDPR · DPDP · HIPAA
- Regulatory reporting — RBI · SEBI · IFSCA
- SOC 2 / ISO-aligned data handling
- Executive KPIs, dashboards & trusted data products
